👤 PROFILE

Software Engineer & AI Prompt Engineer specializing in the design and development of complete, scalable systems. I architect and deliver end-to-end solutions—from intuitive user interfaces and robust APIs to resilient system infrastructure—across mobile, web, and backend platforms. Expert in Flutter, FlutterFlow, and modern backend stacks, with a proven ability to transform complex ideas into fully functional, production-ready products. I build entire digital ecosystems: native mobile applications, responsive web platforms, comprehensive dashboards, and intelligent, AI-powered features. Driven by a passion for leveraging artificial intelligence to automate workflows, revolutionize user experiences, and deliver intelligent, high-efficiency solutions. My focus is on engineering high-impact products that solve critical problems and scale seamlessly.

📁 PROFESSIONAL EXPERIENCE

Wordpress - flutterflow

2023 - 2024

UG Compony • Remote - Zagziik

- WordPress and FlutterFlow combine to deliver powerful digital solutions. Use WordPress for web content and FlutterFlow for mobile apps. This integration enhances your online presence efficiently.

Flutterflow

2024 - 2026

LongTeam-Freelance in France • France

- I served as a long-term FlutterFlow developer in France, where I specialized in creating exclusive applications. My role involved dedicated project work to deliver high-quality solutions for clients.

Freelance Prompt Engineer

2024

Freelance • Remote

- In my capacity as a Freelance Prompt Engineer, I specialize in the systematic design and refinement of input prompts for large language models. This involves applying techniques such as prompt tuning, few-shot learning, and context engineering to enhance model outputs and reduce biases in AI-generated content.
